Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1887 Excerpt: .moderate care in diet will often secure immunity. 7. A patient who has once had diabetes should have his urine examined every few weeks. The glycosuria always precedes the general symptoms of the disease, and these general symptoms can generally be forestalled by proper treatment employed as soon as sugar makes its appearance in the urine. 8. As the disease returns, either from imprudences in diet or from other causes, the successive recurrences present greater and greater difficulties in the way of treatment. OPIUM AND BELLADONNA IN DIABETES MELLITUS. M. Villemain, Prof, of Med. Military Hosp., Val de Grace, reports the case of a young artilleryman of strong constitution, who was admitted with acute diabetes with all its usual symptoms, consisting of a polyuria of fourteen litres a day, and discharging eight hundred and forty-one grammes of glucose in the same period. The usual treatment was...
