

## Oeuvres Completes de Massillon, Eveque de Clermont (11)

Filesize: 4.82 MB

### ***Reviews***

*This pdf is definitely not easy to get started on studying but quite entertaining to read through. I am quite late in start reading this one, but better then never. Once you begin to read the book, it is extremely difficult to leave it before concluding.*

## OEUVRES COMPLETES DE MASSILLON, EVEQUE DE CLERMONT (11)

DOWNLOAD

RareBooksClub. Paperback. Book Condition: New. This item is printed on demand. Paperback. 76 pages. Original publisher: Golden, CO : National Renewable Energy Laboratory, 2011 OCLC Number: (OCoLC)707156244 Subject: Geothermal power plants -- Research. Excerpt: . . . 2 Baseline Power Plants 2. 1 Binary Cycle 2. 1. 1 20 MW ( 158 C resource temperature ) ACC Power Plant For this study, an existing air-cooled power plant with a nominal 20 MW net electric production capacity ( depicted in Figure 1 ) was modeled. Many plant details are provided by Kanoglu and engel Kanoglu 1999 . The working fluid used in the plant is isobutane. This plant suffers an approximate 50 loss of production capacity from winter to summer conditions. A smaller, hypothetical plant, with a nominal 10 MWe production output was also modeled for comparison. The power plant was modeled using the commercially available process modeling software ASPEN Plus. A consistent set of assumptions regarding component efficiencies and heat-exchanger approaches were utilized in the models. Table 1 summarizes the nominal design o conditions for various parameters. Except for the brine resource temperature ( 158 C ) and the ambient temperature at design ( 3 C ), all of which were taken from the Kanoglu work Kanoglu 1999 , all of the values in Table 1 are approximated based on industry standards. Table 1. Summary of Assumed Parameter Values for Analyses Design conditions for ambient air Value Units o Dry-bulb temperature 3 10 C Ambient pressure 101, 322 Pa Design conditions for cooling water o Temperature 25 C Pressure 101, 322 Pa Component efficiencies Turbine generator 0. 87 (---) Brine water other pumps 0. 69 (---) Cooling air fan 0. 52 (---) Brine availability o Temperature ( s ) 125 158 175 C Component Operation o Heat exchanger pinch point...
