Createspace, United States, 2010. Paperback. Book Condition: New. 216 x 140 mm. Language: English . Brand New Book ***** Print on Demand *****.According to this brilliant or nonsensical (depends who s reading it) summary and essay, many of the present scientific mysteries become explicable. And this new science reaches into areas once reserved for religion and philosophy. While the conclusions are unbelievably fantastic by today s standards (we could travel to any point in the universe, or in time, instantly - we could achieve physics holy grail of cosmic unification, and unify the large scale universe with small scale quantum mechanics - we could see eternal health for everyone who ever lived - and proper understanding of unification would not only show that a being called God must exist but humans would be unified with that God), I don t think the steps taken to arrive at those conclusions are irrational at all. They have their foundation in quantum mechanics, Einstein s Relativity, a recent demonstration in electrical engineering at Yale University and, of course, the inspirational work of Professor Stephen Hawking. Yes, I m writing about science AND religion - my book has its beginnings in a cellular automaton (in mathematics and computer science, a collection of cells on a grid that evolves through a number of discrete time steps according to a set of rules based on the states of neighbouring cells) and grew into a belief that the universe has an electronic foundation. I ve always been far more curious about the distant future than the present, and this is what my curiosity has revealed to me. Its conclusions are absolutely incredible at times . which is why I felt the need to spend years (decades, actually) writing a long, detailed article explaining those conclusions, and making...
