

## A Colour Atlas of Plant Propagation and Conservation

Filesize: 2.16 MB

### Reviews

*This created pdf is excellent. This is for anyone who statte that there had not been a really worth reading through. Your life span will probably be transform as soon as you total looking over this publication.*

*(Prof. Esteban Wuckert)*

## A COLOUR ATLAS OF PLANT PROPAGATION AND CONSERVATION

[DOWNLOAD](#)

Manson Publishing Ltd. Paperback. Book Condition: new. BRAND NEW, A Colour Atlas of Plant Propagation and Conservation, Bryan G. Bowes, Don Blaxell, Bryan G. Bowes, N. A. C. Brown, Eric Bunn, While scientific and socio-political communities around the world are aware of the natural and economic importance of biodiversity, we are faced with an ever-increasing number of plant species under threat of extinction. Conservation is thus a vital part of the plant scientist's work, in the field, in botanic gardens and in universities. This colour atlas has been conceived to integrate the dual botanical themes of plant propagation and conservation. Various texts deal with propagation, *in vivo* and *in vitro*, and with aspects of conservation, but none marries the two themes, let alone a book which uses the concise, focused colour atlas approach. Each of the chapters has been written by an acknowledged international authority on the subject, under the editorship of Dr Bryan Bowes whose Colour Guide to Plant Structure (2nd edition 2008) is already highly successful. Topics range from the history and likely future of conservation and the effects of human activity on plant diversity, to the practical techniques of collection, preservation, germination, propagation and management of plant populations in the laboratory and in the field. The text is referenced and is illustrated throughout by colour photos and photomicrographs of the highest quality. It appeals worldwide to students of conservation, plant science and biology, and to professionals and academics, plant propagators, ecologists, and conservationists working in botanic gardens, universities and colleges, in field research and in nurseries specialising in indigenous plants.
