I have seen the condition and appearance of some mouths totally changed--revolutionize as a consequence of such treatment and instructions. The next important step, preliminary to operations of filling, is to make a very careful examination of the mouth, going through it with floss-silk, mouth-glass and small excavators or exploring instruments, tooth by tooth, till the condition of each one is ascertained as nearly as possible with reference to decay, and a permanent record made in a book to be kept for the purpose. Similar signs can be used as in the recording of operations. Doubtful places should be...
